Welcome to At The Sale's Breeze Report

You're holding in your hands the figures you need to win at the tracks! We're always at the sale, every sale, all of the time. For the 2-year-old in-training sales our team is on hand meticulously covering every aspect of each horse's breeze. We strategically place members of our team in the chute, in the lane, and in the turn.

Breeze Speed Figures

You're reading this correctly! In a first of its kind development, AtTheSale has developed proprietary speed figures for every horse that works in the under tack show. No different from the various speed figures you've all seen assigned to horses when they race, we've applied the same principles to each breeze. We use a proprietary system of statistical analysis and subjective evaluation and we assign an AtTheSale Speed Figure (ASF) to every breeze. Find out which horse truly stood out, outworked all the others, and separated itself from the rank and file. The ASF is truly a game-changer and will revolutionize breeze show analysis.

Breeze Report

- We watch the manner in which the horse comes onto the track and approaches the pole.
- We watch how it moves and is handled throughout its work, we assign a letter grade A-F to the breeze, and we include comments.
- We time the horse's gallop-out 1/8 and 1/4 past the wire and we listen to its breathing and for any noises.
- We scrutinize how it finishes and gallops out and we assign a letter grade A-F to the gallop out after the wire, and we include comments.
- Finally we grade the comprehensive overall performance, we assign an all-inclusive letter grade A-F to the overall work, and we include comments.

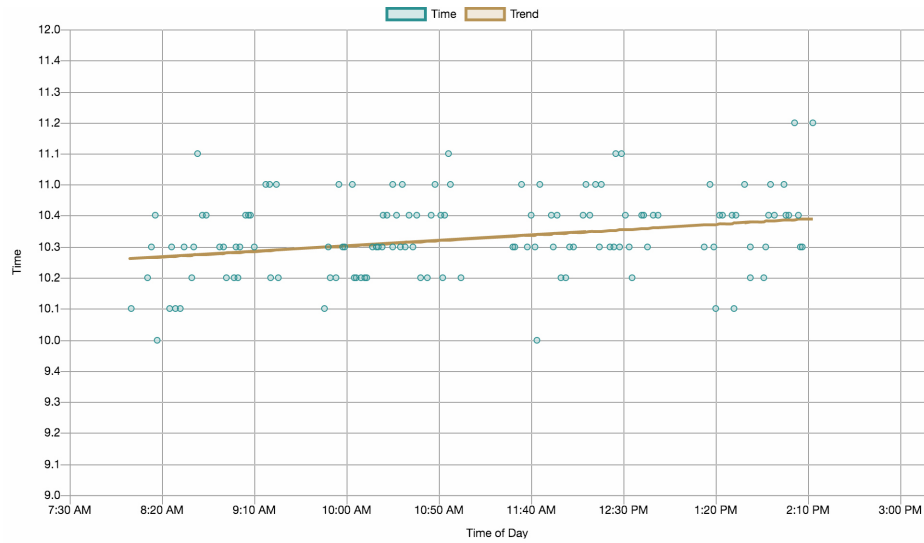

Breeze Chart

We've graphically charted every breeze each day and plotted them all on one chart. See the entire session in one single snapshot. Quickly identify trends and outliers.

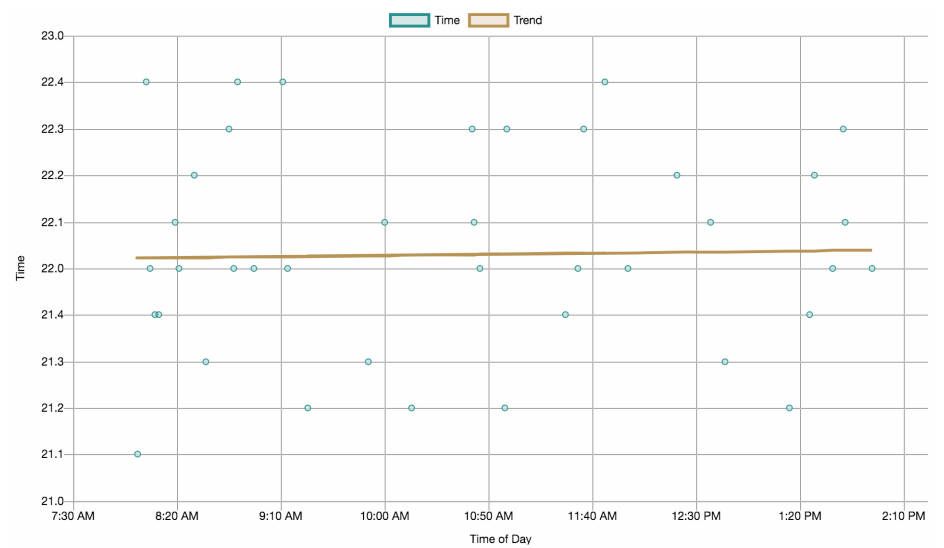

You're going into the sales ring prepared!

At The Sale's mission statement is twofold. Primarily our goal is to bring buyers and sellers together worldwide thereby expanding and enhancing the Thoroughbred marketplace. There's no question that we exist in a global economy. Until now, it has been virtually impossible to acquire a horse without being physically present on the sale grounds or without having someone present on your behalf. At The Sale creates a platform whereby sellers can provide photos, videos, vet reports, and comments about each horse. Additionally, At The Sale has over a quarter million data records in its database containing historical sale results dating back over 10 years. Buyers can access this information and have available to them orders of magnitude more information, right at their fingertips, from anywhere in the world. At The Sale's further goal is to allow buyers who are physically present on the sale grounds efficient and effective use of their valuable time in inspecting horses and maintaining their lists by use of our advanced shortlisting tools and features. Bringing it all together, At The Sale offers bloodstock advisory and consultancy services thereby closing the loop between the sellers and the buyers, dovetailing both sides of the marketplace.
